

Card Access

1. Introduction

This guide outlines a detailed process for using the add-on access cards. Discover the process for requesting a new card and register them for each unit. Learn how to activate and deactivate access cards and fix registration difficulties. Learn the security methods that protect access card data. This tutorial explains how to add access cards. Request a fresh card to register access cards for each unit.

2. Card Access

Residents and approved workers can use a card for condominium entry to get into the building or certain areas. You can use these card accesses instead of keys or fobs, making things easier, safer, and easier to monitor. Card access systems can limit access to lifts, parking lots, and other restricted areas, granting entry only to those who have received approval. Many places use security methods like tracking records and limiting entry based on time.

2.1 Add New Card Access

Go to [Card Access](#) > [New Card Access](#) > [Fill in details](#) > [Add](#)

The screenshot displays the PROPERVA Card Access management interface. On the left is a sidebar with navigation options: PROPERVA logo, various system icons, Operation Insights, Security Monitor (99+), Customer Account C-9-8/1, Cash Book (0.00), General Ledger, Financial Reports, Properties, Suppliers, and Settings (IoT Devices, Approvals, Automation, Auto Payments). The main content area is titled 'Card Access > Approved' and shows a table of approved cards for the date 2025-04-14 (Today). The table includes columns for No., Approved, Unit, Card Holder, Card Type, Expiry Date, and Vehicle Plate Recognition. A sidebar on the right contains icons for various system modules, with 'Card Access' highlighted in a red box.
