

Card Access Control

1. Introduction

This guide outlines a detailed process for using the add-on access cards. Discover the process for requesting a new card and register them for each unit. Learn how to activate and deactivate access cards and fix registration difficulties. Learn the security methods that protect access card data. This tutorial explains how to add access cards. Request a fresh card to register access cards for each unit.

2. Card Access

Residents and approved workers can use a card for condominium entry to get into the building or certain areas. You can use these card accesses instead of keys or fobs, making things easier, safer, and easier to monitor. Card access systems can limit access to lifts, parking lots, and other restricted areas, granting entry only to those who have received approval. Many places use security methods like tracking records and limiting entry based on time.

2.1 Add New Card Access

Go to [Card Access](#) > [New Card Access](#) > [Fill in details](#) > [Add](#)

The screenshot shows the PROPERVA software interface. The records list units C-9-8 through C-8-8, all with 'Resident - Block C' card types and an expiry date of 10-Apr-2035. A dropdown menu on the right is open, showing various system features, with 'Card Access' highlighted in a red box. Other features include Invoicing, Visitors, Facility Bookings, Announcements, Suggestions, Incident Reports, Emergency Numbers, Sub-Users, Face Recognition Access, Vehicle Plate Recognition Access, Integrated Smart Access, Contractor Service Permits, Poserva, and Community Marketplace. 3. CONFIGURATION INSTRUCTIONS FOR PROPERTIES

This guide shows you step-by-step how to set up the Properties Unit part of the VYROX VIP Smart Integrated Property Management System, which was created by VYROX INTERNATIONAL SDN BHD. Property managers, building officials, and facility workers can make and handle each unit, making sure that the information about each unit is always correct. Then, each unit can be easily connected to access control modules like SuperPass-Door for door entry and SuperPass-Lift for lift access. This way, records from each unit can be directly linked to automatic and safe access permits.
