

# Card Access Control

## 1. Introduction

This guide outlines a detailed process for using the add-on access cards. Discover the process for requesting a new card and register them for each unit. Learn how to activate and deactivate access cards and fix registration difficulties. Learn the security methods that protect access card data. This tutorial explains how to add access cards. Request a fresh card to register access cards for each unit.

## 2. Card Access

Residents and approved workers can use a card for condominium entry to get into the building or certain areas. You can use these card accesses instead of keys or fobs, making things easier, safer, and easier to monitor. Card access systems can limit access to lifts, parking lots, and other restricted areas, granting entry only to those who have received approval. Many places use security methods like tracking records and limiting entry based on time.

### 2.1 Add New Card Access

[Go to Card Access > New Card Access > Fill in details > Add](#)

The screenshot shows the 'Card Access > Approved' page in the PROPERVA system. The main content is a table listing approved card access records. The table has the following columns: No., Approved, Unit, Card Holder, Card Type, Expiry Date, Vehicle Plate Recognition, and Vehicle. The data rows show various units (e.g., C-9-8, C-9-7, C-9-6) and card holders (e.g., C98 Unit (Owner), C97 Unit (Owner)). The 'Approved' column shows dates and times (e.g., 11-Apr-2025 11:29 AM). The 'Card Type' column shows 'Resident - Block C'. The 'Expiry Date' column shows '10-Apr-2035'. The 'Vehicle Plate Recognition' column shows 'No'.
