

Membership Discount

The Membership Discount feature allows clubs to offer exclusive pricing benefits to registered members, enhancing member value and encouraging long-term loyalty. This module is designed to support flexible discount structures aligned with different membership tiers and business strategies.

Operators can configure discount rates based on membership type, applicable items or services, and validity periods. Discounts may be applied to gameplay, food and beverages, or selected products, ensuring consistent and transparent pricing for members.

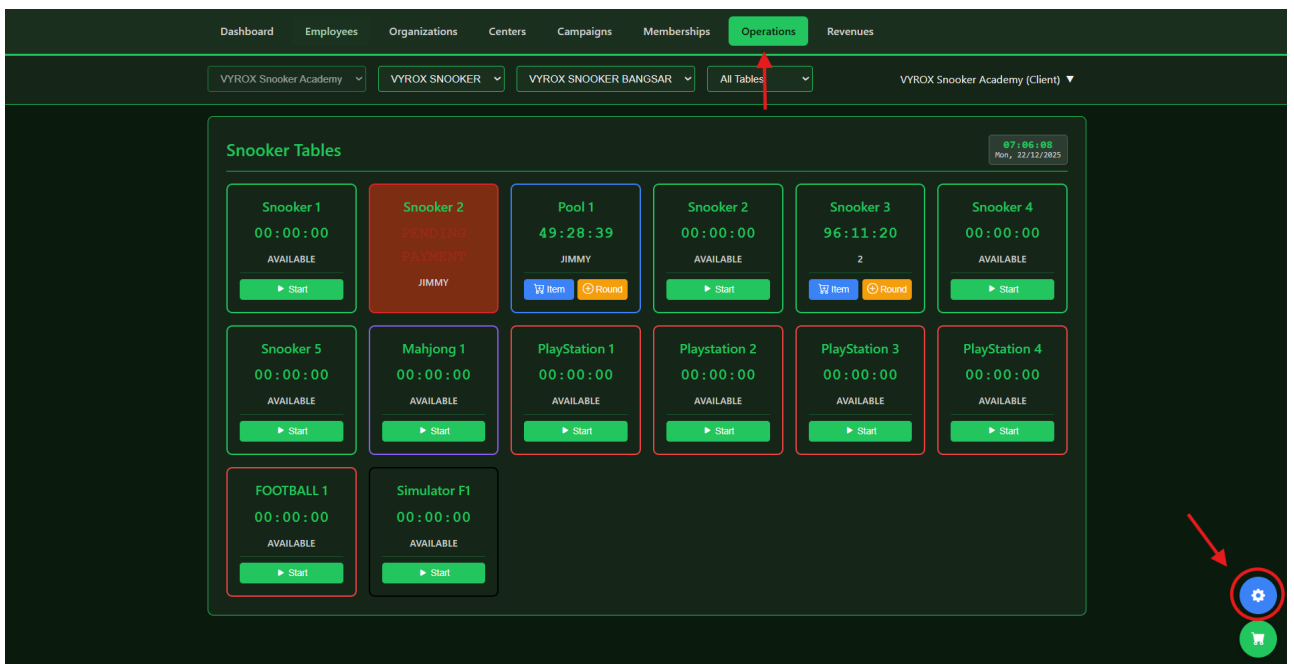

With an intuitive management interface, operators can easily create, update, or control membership discount rules in real time. Once configured, all discounts are seamlessly integrated with the POS system, billing workflow, and member accounts, ensuring accurate discount application and smooth operational control.

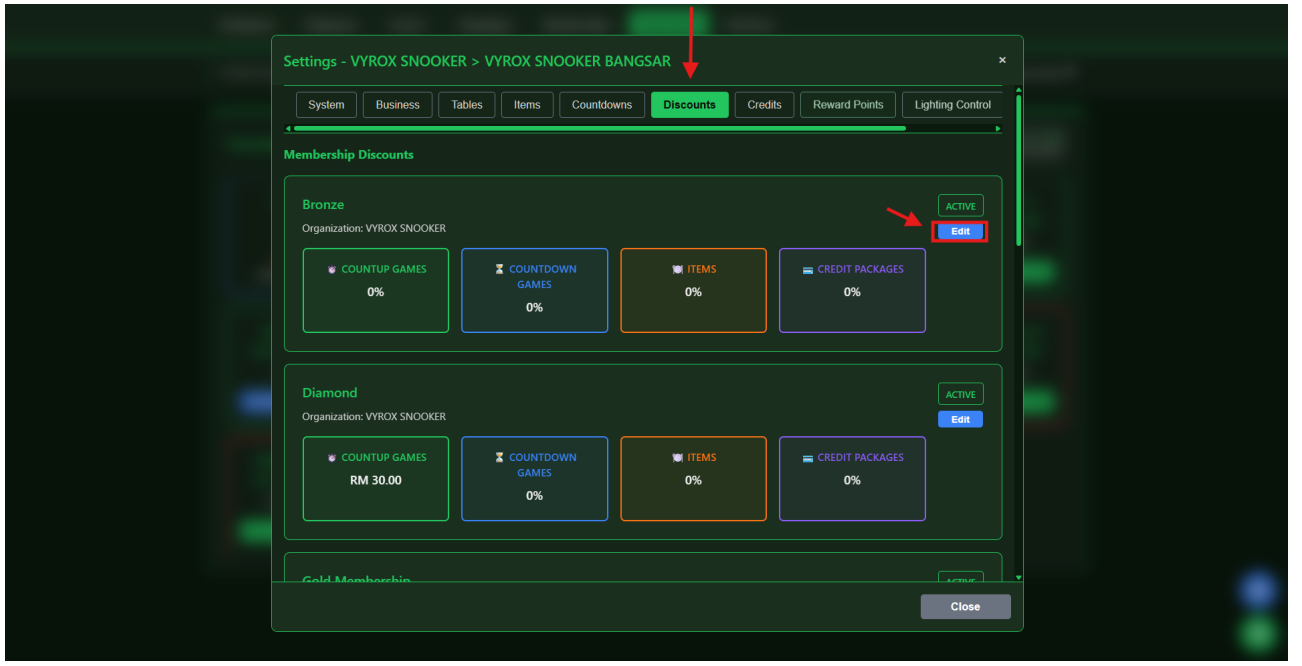

Set Membership Discount

Go to Operation > Click Setting (the blue circle on below) > Go to Discount

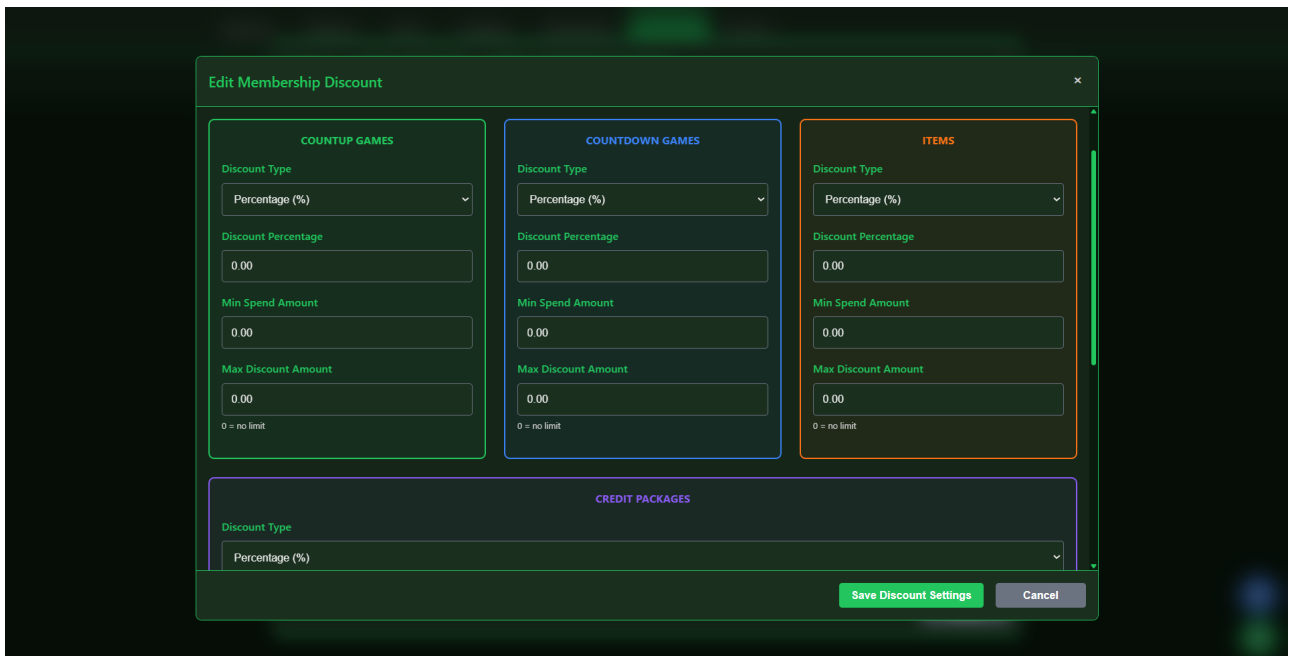

Details to Set Up Table:

Fill out the settings for Countup Game, Countdown Game, Item, and Credit Packages.
