

QR Visitor

1. Introduction

This guide is crafted to optimize the process of managing visitors. It provides step-by-step instructions for utilizing the visitor management system, enabling you to track, monitor, and enhance the overall experience for guests and staff alike.

2. Visitor Management

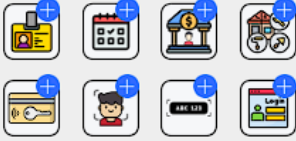

This section offers a comprehensive overview of the tools and features available for efficient visitor management. From check-in processes to visitor logs, all functionalities are designed to streamline your operations.

2.1. Add New SuperPASS Door Device

The SuperPASS Door Device is an advanced access control system installed at building entry points. Visitors and authorized personnel can use a card or QR code to scan and gain secure access to the building. This system ensures a smooth, contactless entry experience while maintaining high security.

To Add New SuperPASS Door Device:

Go to **Settings > VYROX AIoT Devices > SuperPASS-Door > New SuperPASS-Door Device > Fill in details > Add**

Prev Next

Details include:

- SuperPASS-Door Controller Name
- Number of Door Supported (No of Channel = No of Door)
- Label Name of each channel (In & Out)
- Cloud Server

For each Channel/ Door Supported Management can choose to enable :

- The door as an entrance, exit, or perimeter access point for the premises. This means , upon successful access, the visitor status will be updated to "Checked-In" or "Checked-Out" accordingly.
- The "Anti-Passback" feature .This prevents access if a visitor attempts to re-enter an area without first leaving.

For the cloud server :

- Cloud Server API Key is taken from : Server
- SuperPASS-Door Controller Serial Number : Door access application

If Search shows X mark . This means the server cannot find the Controller.

SuperPASS-Door Controller Serial Number

Search

To fix it :

1. Check Serial Number
2. Check Ports and IP
3. Use Debug Tools

Once controller is detected , Search will show green tick mark.

SuperPASS-Door Controller Serial Number

Search

Click **Add** when finish .

2.2. Add New Visitor Type

Go to **Settings > Visitor > Visitor Types > New Visitor Type > Fill in details > Add**

Fill in the Required Details:

1) Visitor Type Name

2) Same-Day Appointments:

- **Always Allow:** Enable same-day appointment scheduling.
- **Minimum Lead Time:** Specify the minimum number of minutes required before the requested Validity Start-Time.
- **Disallow:** If same-day appointments are not allowed, choose to either: Allow but require approval or Disallow it entirely.

3) Future Appointments:

- Decide if visitors can schedule appointments for future dates (from the next day onward).

4) Appointment Booking Windows :

- Set When the visitor type can be requested

5) Visitor Pass Validity :

- Set the duration for which the visitor pass will remain valid after approval.

Management can choose between:

- **Fixed to:** The pass will valid for set amount of time after the approval
- **Until:** The pass will valid until the set time of the day

6) Early Check-In

- Decide whether to allow visitor to use pass before appointment time

7) Edit Visitor Pass Validity after Creation :

- Decide whether to allow visitor to change visitor pass validity after creation.

Difference: Booking Window vs. Visitor Pass Requested

Booking Window
Booking window is the designated time range within which visitor passes are generally valid and prioritized.
Visitor Pass Requested
Visitor pass requested refers to the start & end times that the user (visitor) is asking for their pass to be valid.

8) If the requested pass validity :

- Start and end times are **before** the booking window starts.

Example:

- **Booking Window:** 12:00 PM to 2:00 PM
- **Visitor Pass Requested:** 6:00 AM to 7:00 AM

Options:

- **Allow:** Allow visitor pass to be created
- **Do not Allow:** Prohibit visitor pass to be created
- **Subject to approval:** Need approval before pass creation

9) If the requested pass validity :

- Start time is **before** the booking window start time.
- End time is **during** the booking window .

Example:

- **Booking Window:** 12:00 PM to 2:00 PM
- **Visitor Pass Requested:** 11:30 AM to 12:30 PM

Options:

- **Allow:** Allow visitor pass to be created
- **Allow but limit requested validity start time to the booking window start time:** Pass created is the booking window time. The pass is created from 12:00 PM to 12:30 PM.
- **Do not allow:** Prohibit visitor pass to be created
- **Subject to approval:** Need approval before creation

10) If the requested pass validity :

- Start time is **during** the booking window .
- End time is **after** the booking window end time.

Example:

- **Booking Window:** 12:00 PM to 2:00 PM
- **Visitor Pass Requested:** 1:30 PM to 2:30 PM

Options:

- **Allow:** Allow visitor pass to be created
- **Allow but limit requested validity end time to the booking window start time:** Pass created end time match the booking window end time. The pass is created from 1:30 PM to 2:00 PM.
- **Do not allow:** Prohibit visitor pass to be created
- **Subject to approval:** Need approval before creation

11) If the requested pass validity :

- Start and end times are **after** the booking window ends.

Example:

- **Booking Window:** 12:00 PM to 2:00 PM
- **Visitor Pass Requested:** 3:00 PM to 4:00 PM

Options:

- **Allow:** Allow visitor pass to be created
- **Do not allow:** Prohibit visitor pass to be created
- **Subject to approval:** Need approval before pass creation

Edit Visitor Pass Validity after Creation

Allow
 Do not allow

OH Requested Validity Booking Window 24H

If the requested validity start-time and end-time both fall before the booking window start-time

Allow it
 Do not allow
 Subject to approval

OH Requested Validity Booking Window 24H

If the requested validity start-time falls before the booking window start-time, and the requested validity end-time falls after the booking window start-time and the requested validity end-time falls before the booking window end-time

Allow it
 Allow it but limit the requested validity start-time to the booking window start-time
 Do not allow

 Allow it but limit the requested validity end-time to the booking window end-time
 Do not allow
 Subject to approval

OH Booking Window Requested Validity 24H

If the requested validity start-time and end-time both fall after the booking window end-time

Allow it
 Do not allow
 Subject to approval

12) If the requested pass validity :

- Start time is **before** the booking window start time.
- End time is **after** the booking window end time.

Example:

- **Booking Window:** 12:00 PM to 2:00 PM
- **Visitor Pass Requested:** 11:00 AM to 3:00 PM

Options:

- **Allow:** Allow visitor pass to be created
- **Allow but limit the request validity start-time and end time to the respective booking window accordingly:** Pass created is the booking window time. The pass is valid from 12:00 PM to 2:00 PM.
- **Do not allow:** Prohibit visitor pass to be created
- **Subject to approval:** Need approval before pass creation

13) Grace Period

- Allow a number of minutes grace period after a visitor pass has expired , during which the visitor may still be granted access through the access controls.

14) Expired Visitor Pass Extension

- For visitors without an approved Contractor Service Permit or Facility Booking
- Allow a number of minutes extension if requested within a number of minutes after validity end-time.

15) QR Key Time Limit

- Use Dynamic QR code and refresh it every few seconds or use static QR code

16) QR Key Usage Limit

- Limit the number of times the QR key is used

17) Check In Requirements for Pre-Registered Visitors

- Identity verification is needed or not at guard house upon arrival
- **If needed** Visitor let guard scan QR code provided for express identity verification process
- **If not needed,** Visitor scan QR key provided at QR readers and access to premise directly

18) SuperPASS-Door Access Control

- Decide which door this visitor type can use
- Dynamic QR code and refresh every seconds or Static QR code
- QR Key Usage Limit

19) SuperPASS-Lift Access Control

- Decide which lift this visitor type can use

20) UltraPASS-Face Access Control

- Decide outside or Inside Face Access

22) UltraPASS-Vehicle Access Control

- Decide whether to use VYROX BionicEYE for Vehicle Access

22) Prerequisite Requirements

- Require approved contractor service permit or Facility booking.
- Both permit and booking is selected from dropdown on form , upon new visitor registration

23) Long Term Visitor Pass Renewal

Simplifies the process for visitors who frequently need access, such as renovators or event staff, by allowing them to renew their existing visitor pass for future check-ins.

Self-Renewal :

- Visitors can click the [Renew] button on their Visitor Pass Page to renew their pass.
- Once renewed, the pass will retain its settings and show the status “Pending Check-In.”

How It Works

a. If option is Enabled:

- **Seamless Check-In :** Visitors do not need to register again at guardhouses or security checkpoints during the validity period of their contractor service permit or facility booking.

b. If option is Disabled:

- **Manual Check-In:** Visitors must register at guardhouses or checkpoints for every check-in.
- Security officers need to manually click [Renew] in the guard portal for each visitor, even if permits or bookings are still valid.

Difference: Renewal vs. Reapplying

Renewal	Reapplying
Updates the existing visitor pass.	Creates a brand-new visitor pass.
Consolidates all visitor tracking information into a single pass	Uses previous visitor details but starts fresh.

VYROX BionicEYE

Prerequisite Requirements

An approved contractor service permit is required
Select the permit from the dropdown on the form, upon new visitor registration

An approved facility booking is required
Select the booking from the dropdown on the form, upon new visitor registration

Long Term Visitor Pass Renewal (eg. for renovators and event staffs)

Allow visitors to renew their own visitor pass for upcoming check-ins by displaying a [Renew] button on their visitor pass page, which they can click to renew as needed. The visitor pass will be renewed based on the settings, and its status will be updated to "Pending Check-In" upon successful renewal.

If this option is enabled, visitor registration at guardhouses or security checkpoints will not be required until the end of the contractor service permit or facility booking.

If this option is not enabled, visitor registration at guardhouses or security checkpoints will be required, and security officers will need to click [Renew] in the guard portal for each visitor check-in, even if the contractor service permit and facility booking are still valid.

Renewal differs from reapplying. Reapplying creates a new visitor pass using previous visitor details, whereas renewal updates the existing visitor pass, consolidating all visitor tracking information into a single pass.

2.4. Edit New Visitor Form

Go to **Settings > Visitor > New Visitor Form > Edit visitor form**

Catagories to edit visitor form

1. Visitor Personal information

- 2. Images for Visitor Personal Identification
- 3. Images for Visitor Vehicle
- 4. Other Display Settings

The screenshot displays the 'New Visitor Form' settings page. On the left is a sidebar with a list of system settings including Automation, Auto Payments, Bank Details, Consumption Tax Types, Concierge Services, Contractor Service Permits, Customer Payment Verifications, Cut-off Time, Facilities, POSERVA, Public Holidays, Revenue Definition, Rental Types, Rates, Fees and Charges, Products, Ticket Types, Transaction Items, User Accounts, and Visitors. The main content area is titled 'Settings > Visitors > New Visitor Form' and includes a breadcrumb trail. Below the title are tabs for 'Visitor Types' and 'New Visitor Form'. A black header bar reads 'New Visitor Form'. The settings are organized into four panels:

- Visitor Personal Information:** Includes checkboxes for Identity Document No. (checked), IC No., Passport No., WhatsApp No. (checked), Email Address, Physical Access Card No. (checked), Physical Vehicle Card No. (checked), Physical Visitor Card No. (checked), Physical Contractor Card No. (checked), and Physical Maid Card No. (checked). A 'Save Changes' button is at the bottom.
- Images for Visitor Personal Identification:** Includes checkboxes for Visitor Face, Driving License (Front) (checked), Driving License (Back), IC (Front) (checked), IC (Back), Passport, Visa, Employment Pass, Work Permit, Covid-19 Test Report, Covid-19 Vaccination Certificate, and MySejahtera Profile Page. A 'Save Changes' button is at the bottom.
- Images for Visitor Vehicle:** Includes checkboxes for Vehicle Plate, Vehicle Front-Center, Vehicle Front-Left, Vehicle Front-Right, Vehicle Back-Left, and Vehicle Back-Right. A 'Save Changes' button is at the bottom.
- Other Display Settings:** Includes checkboxes for Parking Lot Assignment, QR Key Details, and Remarks. A 'Save Changes' button is at the bottom.

 Below the sidebar, there are two document lists: 'Newly Created Documents' with entries like OR00000891 (4h) and IV00003046 (4h), and 'Recently Accessed Documents' with entries like IC00020395 (12d) and IV00003022 (23d). A 'Show More' button is present under the first list.

2.5. Add New Visitor

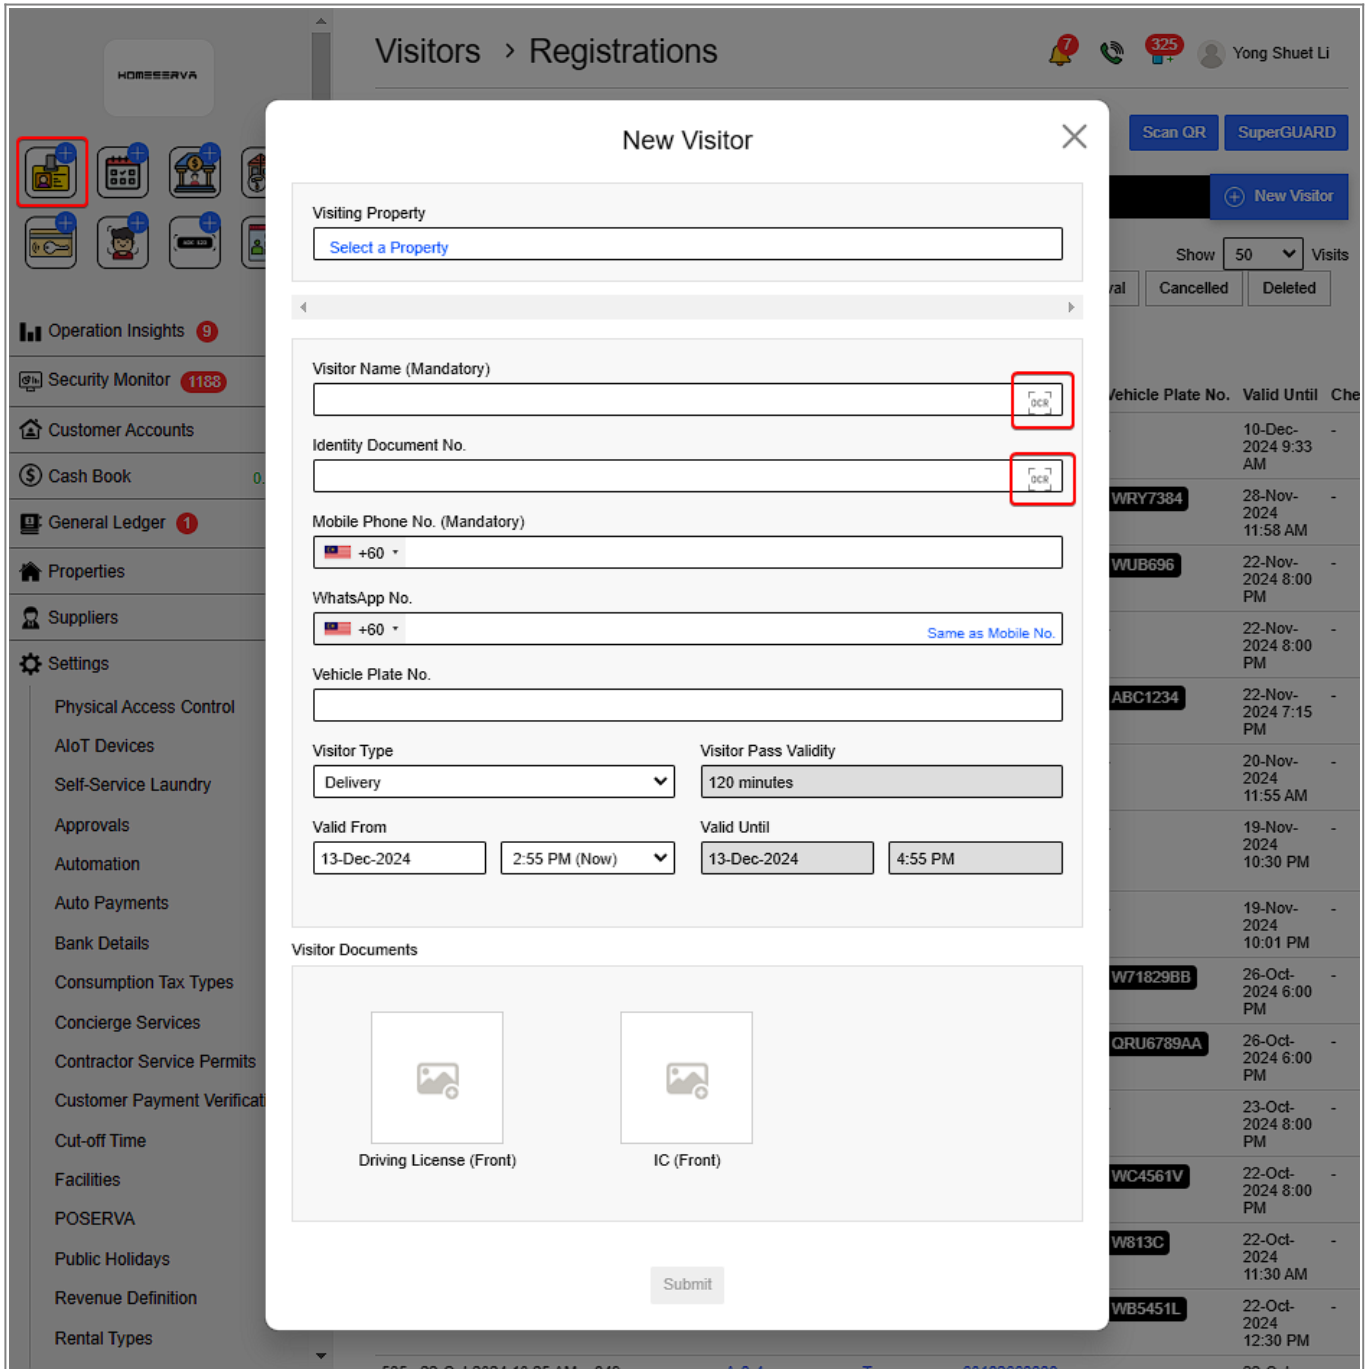

Go **Visitor > Select a Property > OK > Fill in details for New Visitor > Submit**

Details include:

- 1. Visitor Name
- 2. Identity Document (Driving License or MyKad)
- 3. Phone number
- 4. Vehicle Plate
- 5. Visitor Type (Such as : Visitor , Delivery , Contractor)

- 6. Visitor Valid time
- 7. Visitor Driving license and IC picture

Both name and IC can be filled in automatically using the scan feature .

2.6. Share QR code to Visitor

After new visitor registration is made , go to **More options > Make QR-Key**

The screenshot shows the POSERVA system interface. On the left is a sidebar with navigation icons and menu items like 'Operation Insights', 'Security Monitor', 'Customer Accounts', 'Cash Book', 'General Ledger', 'Properties', 'Suppliers', 'Settings', 'Physical Access Control', and 'AloT Devices'. The main area is titled 'Visitors > Registrations' and features a top navigation bar with buttons for 'Registrations', 'Checked-In', 'Most Visited Vehicles', 'Denylist', 'Allowlist', 'Scan QR', and 'SuperGUARD'. Below this is a filter bar with 'Visitors', '2024-12-13 (Today)', and 'New Visitor' buttons. A secondary filter bar includes 'Approved', 'No Show', 'Rejected', 'Pending Check-In', 'Pending Approval', 'Cancelled', 'Deleted', and a 'Show 50 Visits' dropdown. A search bar is also present. The main content is a table with columns: No., Appointment, Visitor Pass No., Visiting Property, Visitor, Mobile No., Vehicle Plate No., Valid Until, Checked By, and Status. A context menu is open over the first row, showing options: 'Pending Check-In', 'Edit', 'Check-In', 'Make QR-Key' (highlighted with a red box), 'View Visitor Pass', 'Print Visitor Ticket', 'Cancel Visitor Pass', and 'Delete'. A large white overlay with a QR code is centered on the screen, with the text: 'Use the QR Code below to gain access through gates, doors, and lifts. Expire in 9 seconds. This QR Code is dynamic and changes over time for enhanced security. Please do not take a screenshot and instead share the entire Visitor Pass.'

With the QR-key Guards will go to **SUPERGUARD > Scan QR code/click here > Visitor > Scan QR > Check-In**

This screenshot is similar to the first one but shows the 'SuperGUARD App' overlay. The overlay text reads: 'SuperGUARD App. Scan the QR code below to log in on another smart device, or click here to open it in a new tab within this internet browser.' The QR code is centered in the overlay. In the background, the 'SuperGUARD' button in the top navigation bar is highlighted with a red box. The table below the overlay shows the same visitor registration data as the first screenshot.
