

4. Set Up Table & Price

The Table Setup & Pricing feature allows snooker club operators to configure tables and set pricing structures with flexibility and precision. This module is designed to support different table types, game modes, and pricing strategies to suit individual business needs.

Users can define table names, assign table categories, and configure rates based on time, game type, or usage method. Prices can be customised to support countdown billing, fixed sessions, promotional rates, or member-exclusive pricing. This ensures transparent billing and accurate charges for every game session.

With an intuitive setup process, operators can quickly adjust table availability and pricing to optimise revenue, improve customer experiences, and maintain full control over their operations. Once configured, all table and pricing settings are seamlessly integrated with the POS system, booking flow, and automated table light control.

4.1 Set Up Table

Go to Operation > Click Setting (the blue circle on below) > Go to Tables

Details to Set Up Table:

1. Add type table
2. Go to table management and add table

Step 1:
