

# System Setting

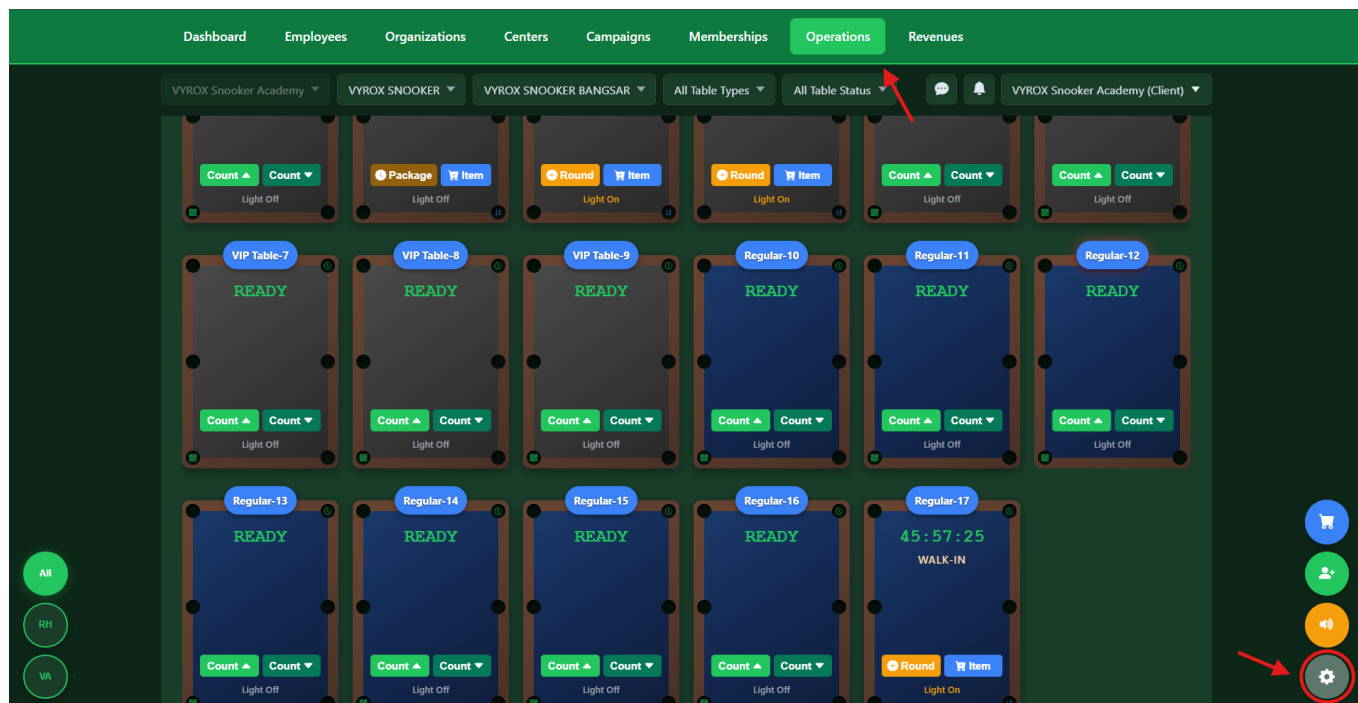

The System Setting module enables operators to configure key system parameters for accurate and efficient operations. It allows adjustment of the timezone and date/time format, ensuring correct timestamps across all activities. The module also supports the Google Geocoding API for automatic location detection and includes options to enable group chat, configure RFID and QR code devices, upload center photos, and customise theme colours. Overall, it ensures system consistency, operational accuracy, and a smooth user experience.

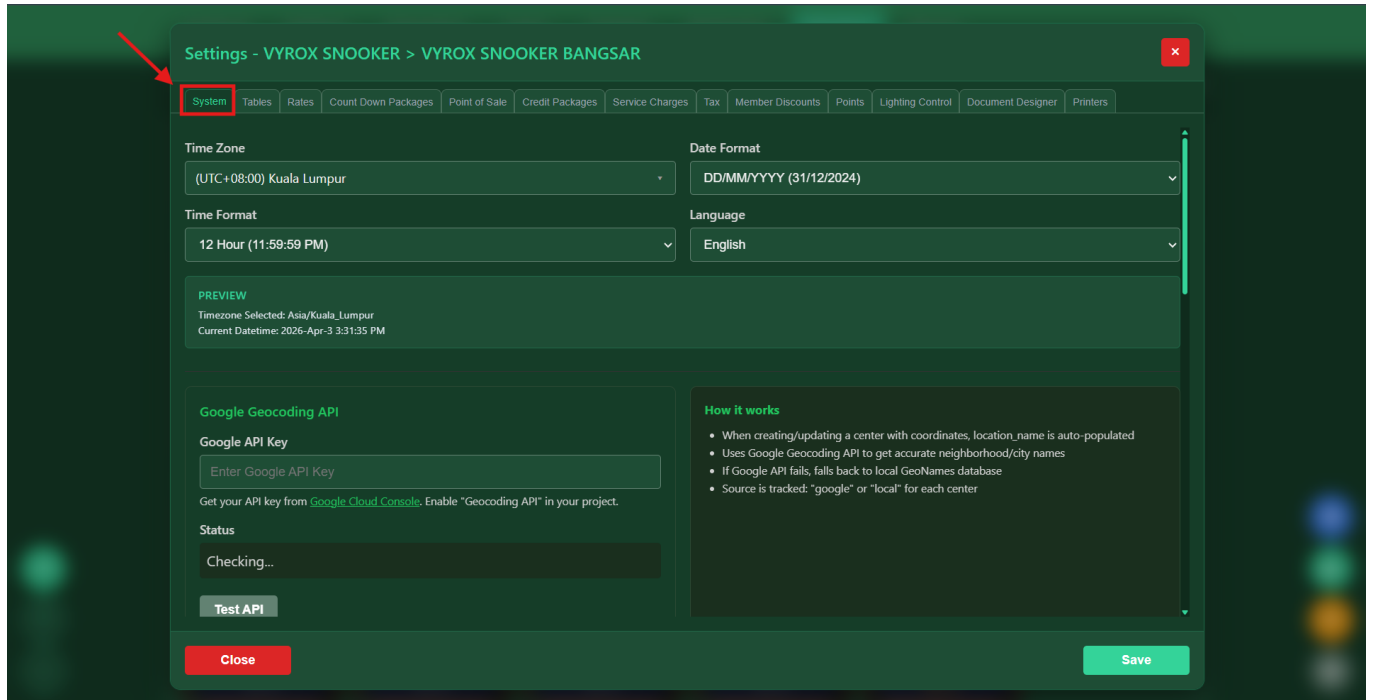

## System Setting

Go to Operation > Click Setting (the blue circle on below) > Go to System

Details of System Settings:

1. Select 'Time Zone'
2. Choose 'Date Format'
3. Choose 'Time Format'
4. Tick or untick 'Group Chat'
5. Active function or not 'Hardware Peripherals'
6. Put 'Center Photos'
7. choose 'Theme Colours'
