

Tree service Janesville work often starts with evaluating what the tree is doing now and what could happen during high winds, heavy snow or saturated ground.(Image: <https://burst.shopifycdn.com/photos/chinese-tea-service.jpg?width=746&format=pjpg&exif=0&iptc=0>)(Image: <https://burst.shopifycdn.com/photos/light-on-wet-pine-tree.jpg?width=746&format=pjpg&exif=0&iptc=0>) Targeted pruning can remove weak branches, **reduce rubbing** limbs and improve airflow and sunlight for long-term growth After removals, stump grinding service can help restore the area, reduce trip hazards and make it easier to replant or use the space If you are dealing with dead limbs over the roof, recurring storm debris or trees that look stressed, it helps to address the issue before it becomes an emergency
